OUROGEN

Your AI coworker.

Tell it what you need in a chat. It replies to email, joins meetings, follows up — and reports back with exactly what it did.

Seed pitch · [Month 2026]

ourogen.ai

THE PROBLEM

Founders run the company in the gaps between email and meetings.

The inbox never ends

Replies to customers, investors and candidates wait on one person.

Meetings eat the day

Intro and qualification calls repeat the same questions, then need notes and follow-ups.

Follow-ups slip

CRM updates and promised next steps fall through the cracks.

THE SOLUTION

Delegate the way you'd brief a great chief of staff.

“Reply to my unanswered emails from today.”

“Join my 2pm with Northwind — find out their budget and timeline.”

It does the work in your voice, asks before anything risky goes out, and posts what it did back into the same chat.

HOW IT WORKS

Four steps from sign-up to hand-off.

1

Connect

Gmail, Calendar, Slack and HubSpot, in a few clicks.

2

Learn

It reads 90 days of history to learn your people, deals and writing style.

3

Delegate

Ask in chat. It drafts, joins calls and follows up.

4

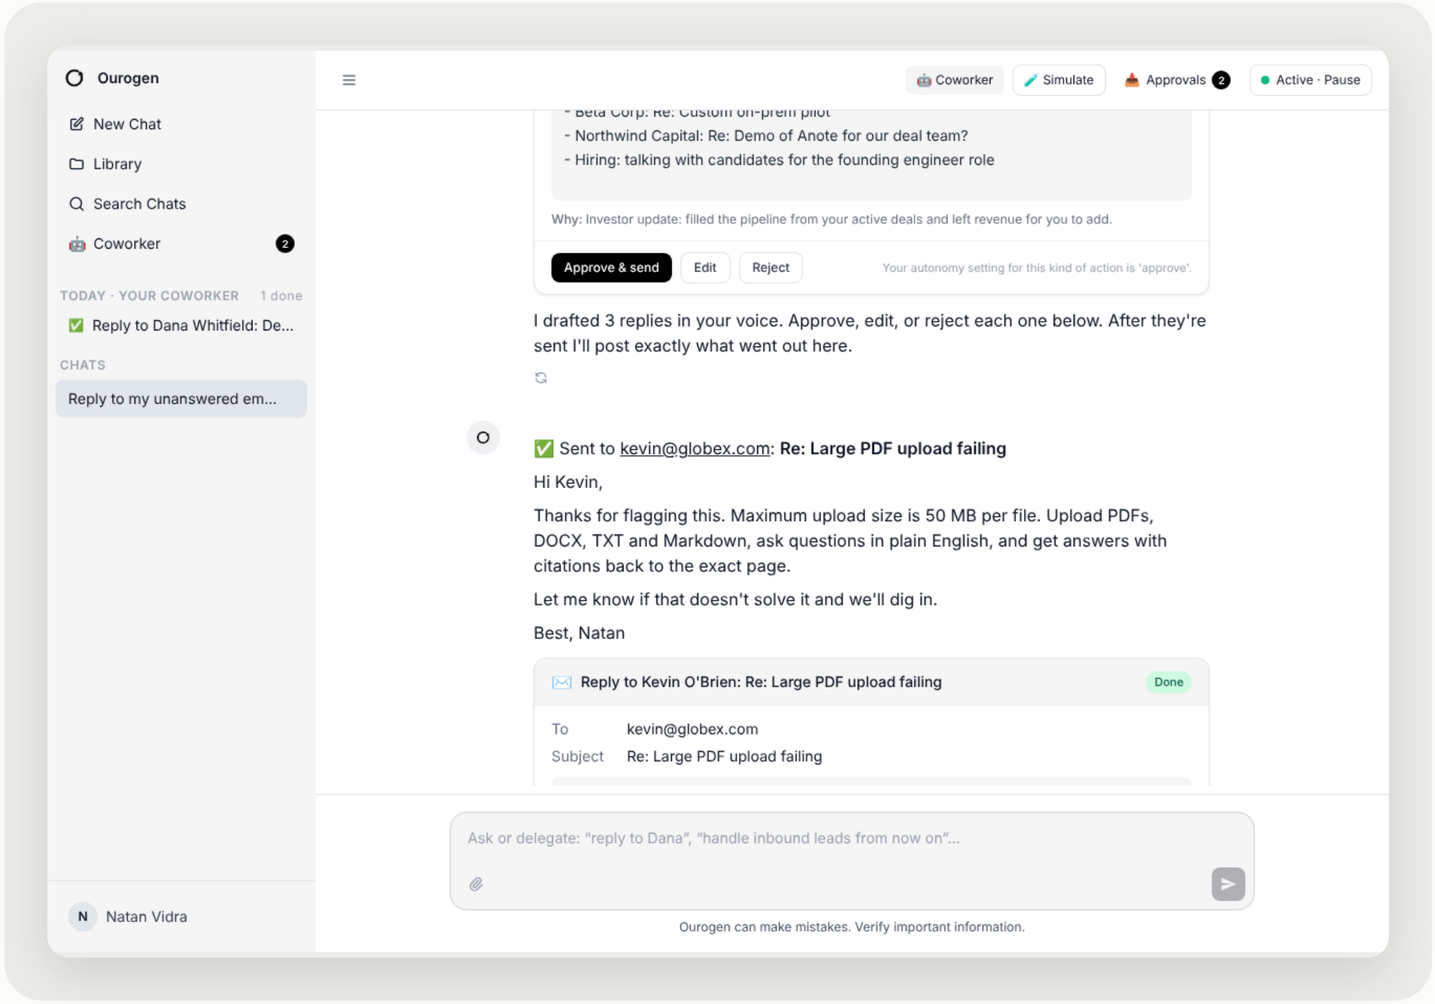

Approve

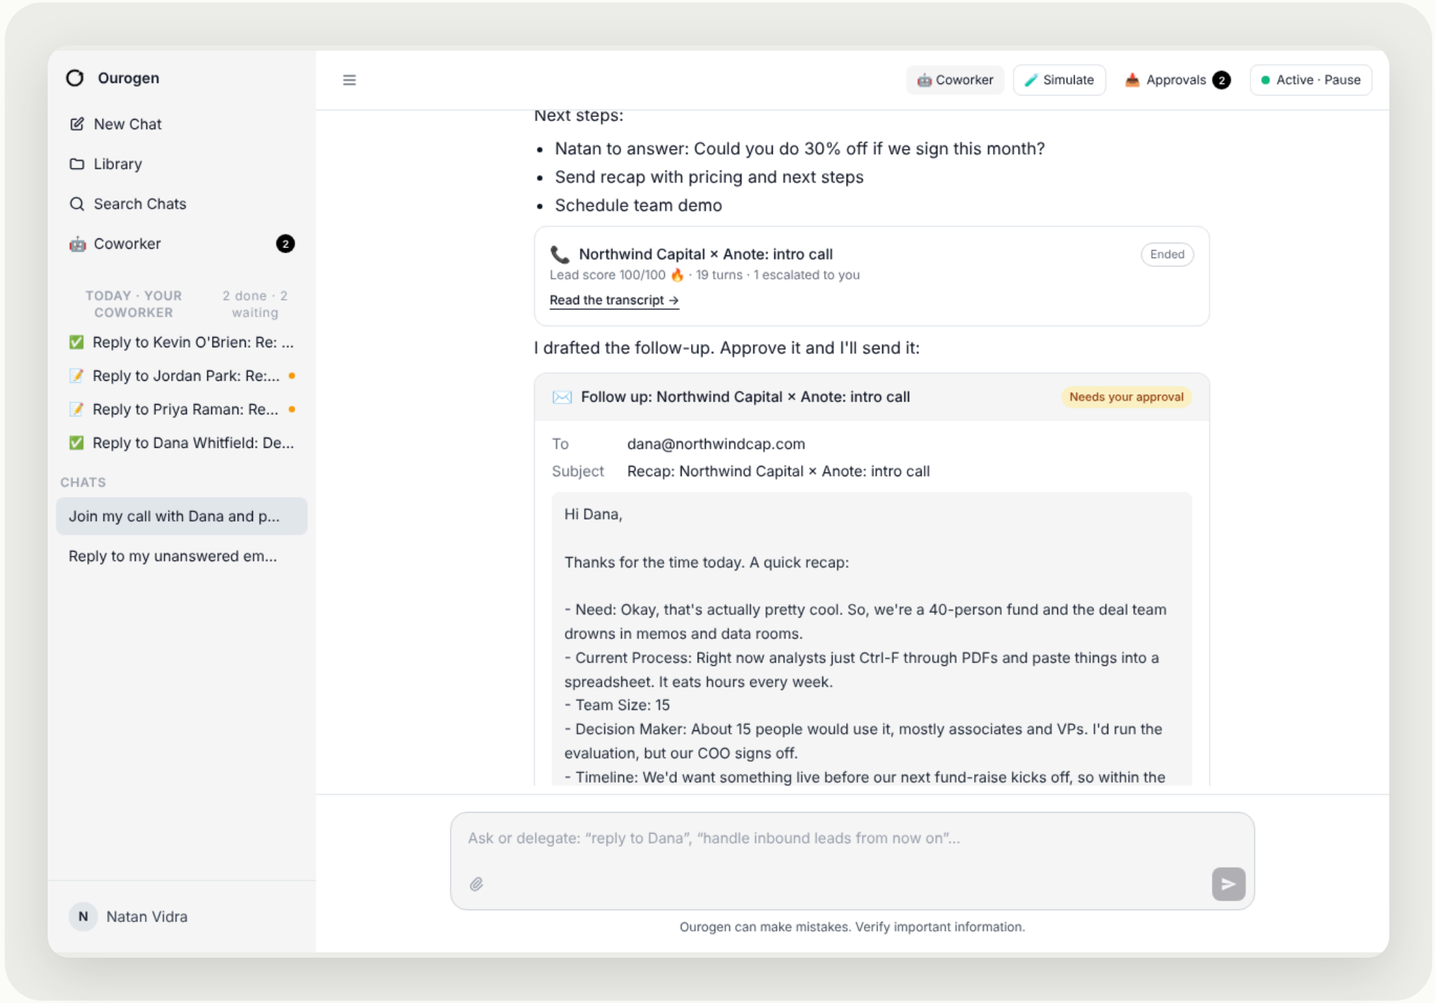

One tap on web, email or phone. Autonomy grows as trust does.

HAND-OFF 1 · EMAIL

“Reply to my emails.”

- Drafts each reply in your voice, with context from past threads
- Holds anything risky for your approval
- Reports back with the exact text it sent

HAND-OFF 2 · MEETINGS

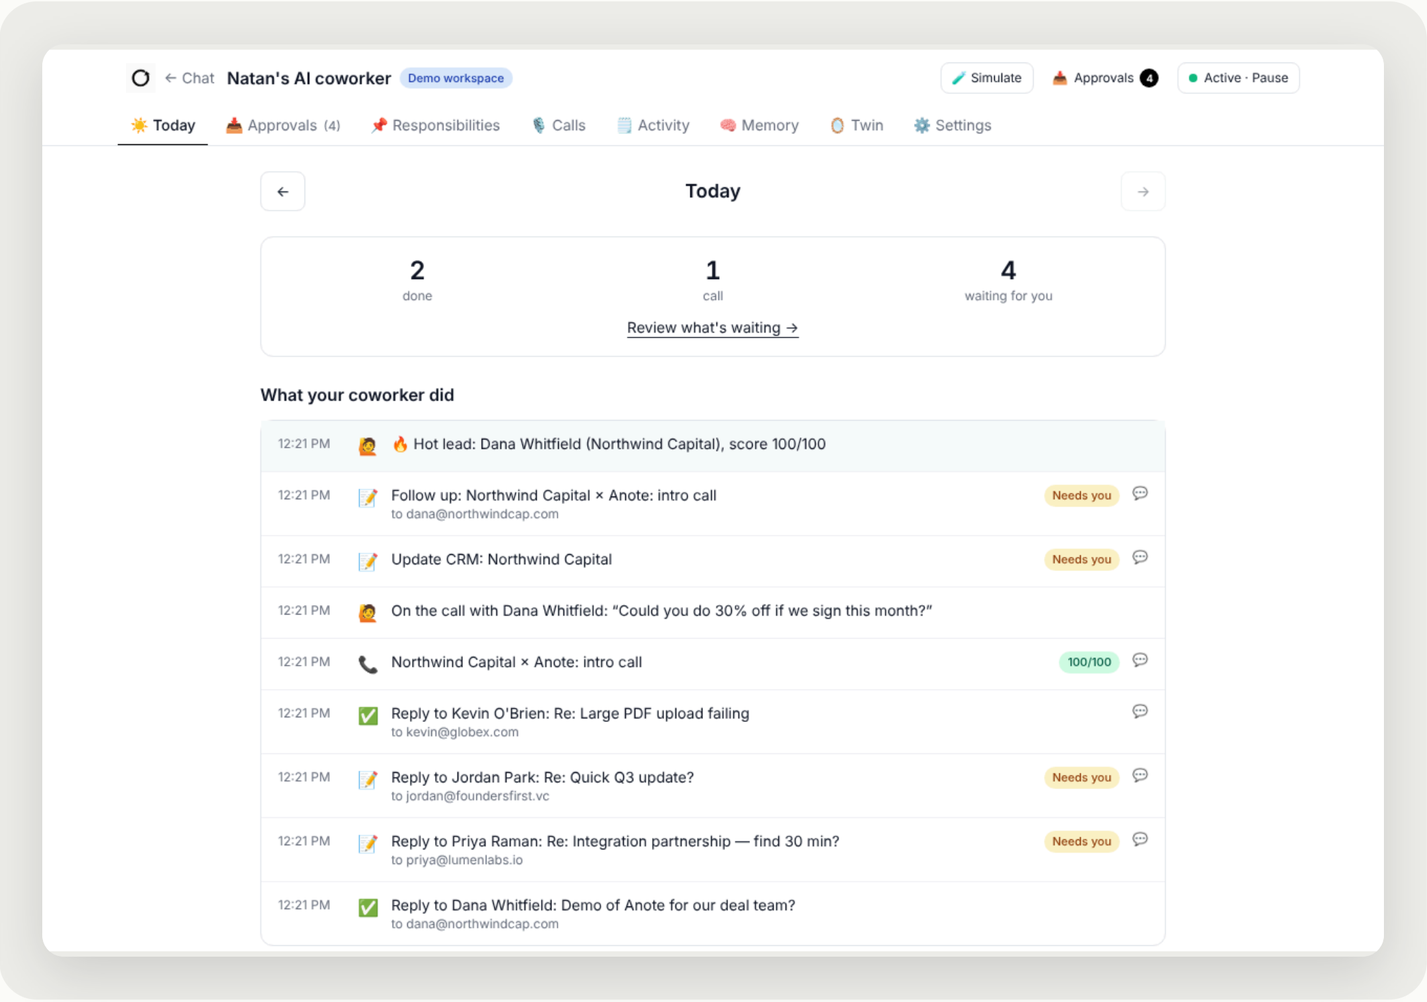

"Join my 2pm and qualify them."

- Joins as a disclosed AI notetaker, or speaks in your cloned voice
- Asks for consent before recording
- Returns a summary, a lead score and a follow-up draft

HAND-OFF 3 · YOUR DAY

Everything it did today, on one page.

- Meetings attended, emails sent, follow-ups queued
- What still needs you, at the top
- The same view on your phone, with push approvals

TRUST IS THE PRODUCT

You only delegate to something you can stop.

Approvals with hard floors

New recipients, money and commitments always ask first. Approve from web, email or a phone notification.

Stop it in one step

A kill switch in every app, or reply STOP to any email it sends. It never double-replies after you do.

Consent and disclosure

It discloses that it's AI, asks before recording, and won't clone a voice that doesn't match yours.

249 eval cases gate every release, covering triage, call guardrails, recall and prompt injection. Building them lifted injection detection from 48% to 100%, with no false positives on benign mail.

PRODUCT

Wherever you work, on the model you choose.

Surfaces

- Web app: chat, Today, Calls and Activity
- Mobile: push approvals and live call takeover
- Meeting bot for Zoom, Meet and Teams
- Voice and video twin, with consent checks

Model-agnostic

- Claude, GPT, Gemini or a local Llama
- Switch models per user in Settings
- Bring your own key, or use ours
- Gmail or Outlook, Calendar, Slack, HubSpot

BUSINESS MODEL

Priced against an assistant's salary, not software seats.

Free

$0

Try it on your inbox, with approvals on everything.

Coworker

$199

Per month. Email, calendar, Slack and CRM follow-ups.

Coworker + Calls

$599

Per month. Adds meetings, voice and video, with metered minutes.

Team

$1,000

Per month. Shared governance and employer controls.

Self-serve upgrades and downgrades through Stripe, prorated. Call minutes are metered against vendor cost.

WHERE WE ARE

Built, tested, and opening the pilot.

~800	249	[__]	[$__]
automated backend tests, at 93% coverage	eval cases across 7 suites, all passing	pilot users or waitlist sign-ups	committed or monthly recurring revenue

Shipped: chat delegation, meeting bot, voice twin, mobile approvals, Stripe plans, model choice and the eval gate.

GO-TO-MARKET AND ROADMAP

Start with founders, then their teams.

NOW

- Founder pilot on Gmail or Outlook
- Google and Microsoft app verification
- Live vendor checks

NEXT

- Role pages for sales, recruiting, investing
- Auto-join chosen meetings
- Streaming voice on calls

LATER

- Team plan with SSO
- Org-wide governance
- A coworker per employee

Built-in distribution: every call it joins and every email it sends introduces Ourogen to someone new.

THE ASK

Raising [$__] to put a coworker on every founder's team.

[__%]	[__%]	[__ mo]
Engineering and reliability	Pilot growth and go-to-market	Runway to [milestone]

Hand it off.
